

WATERFALLS

**THE MOST BEAUTIFUL WATERFALLS AROUND
ALLEGHE TELL THE STORY OF THE EVOLUTION OF
THE LANDSCAPE AND HIDE MAGICAL PLACES**

MASARÈ' WATERFALL

The Masarè or Ru de Rialt waterfall can be easily reached with a short climb of about 14 minutes along a path from the hamlet of Masarè di Alleghe. From the centre of the hamlet, proceed along Via Pascoli to a car park where the short path begins, leading to the beautiful and refreshing waterfall. On the way back, it is possible to make a loop return by following the downhill dirt road that leads back to the start of the path. A cool place in summer, it is not a winter route due to ice and snowdrifts.

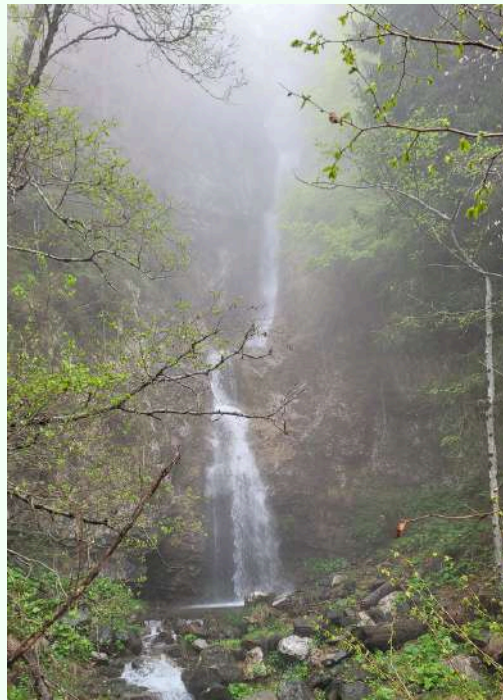

SPINA WATERFALL

This ephemeral waterfall is located below the slopes of Monte Fertazza and can be reached by a beautiful circular route from the village of Pian di Alleghe or also from Caprile along the Carducci path.

Information on the route is available on the website www.alleghe-dolomiti.it in the excursion area: <https://rb.gy/nszpq>

WATERFALLS IN THE SAN LUCANO VALLEY

The San Lucano Valley offers an extraordinary route through the most impressive waterfalls in the Dolomites. Starting from Coi di Prà, a hamlet of Taibon Ag., you can follow the silvopastoral road that leads to the most accessible cascade. For those who would like to learn more, there is a route designed by Prof. Alberto Bertini available online in the 2021 newsletter of the Gruppo Natura Bellunese.

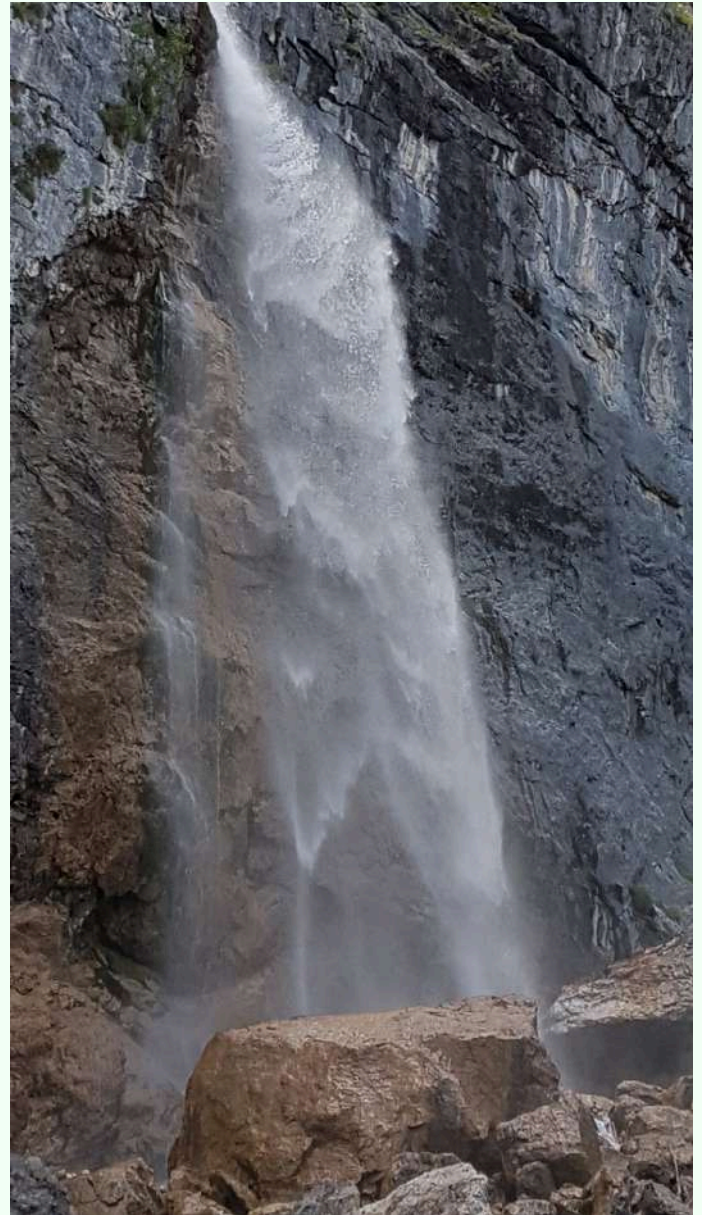

BAREZZE WATERFALL

The Barezze waterfall in the Valle del Biois can be the ideal destination for a simple walk for the family, starting from the hamlet of Meneghina in the municipality of Falcade. Or it can offer a more demanding but interesting and rewarding excursion by following the geological path of the Gavon Torrent, which starts lower down and which can be well identified using the description of the Agordino site where the Dolomites are found at this link: <https://www.agordinodoverinasconoledolomiti.it/falcade-il-sentiero-geologico-del-torrente-gavon/>

COMELLE WATERFALL

In the beautiful Gares valley, there is a loop trail that leads all the way down to the Comelle waterfalls. A tour with a fair climb of about one and a half hours that is rich in satisfaction

To get to the start, you pass through Canale d'Agordo and head into the Valle di Gares for 7 km to the Capanna Cima Comelle hut

"SOFFIA"

WATERFALL AND

"BRENTON CADINI"

The Valle del Mis in the Dolomiti Bellunesi National Park is one of the most interesting naturalistic jewels to be discovered. At the head of Lago del Mis, with a walk of just a few minutes you can admire the Cascata della Soffia on the orographic left and the Cadini del Brenton, a system of potholes created by the waters of the Brenton, on the right of the Mis torrent.

FANES WATERFALLS

From Cortina d'Ampezzo, proceed in the direction of Fiammes and enter the park's access area. When you reach the Outo bridge, you can admire the waterfalls from a privileged vantage point. For those who wish to do so, there is also an equipped circular route that allows you to pass right under the waterfalls. Various visit proposals are available online. For the equipped route, we recommend consulting the guides of Cortina .

GAVON GRANT E GAVON PICOL

A short, wonderful walk to reach two beautiful potholes in Val di Zoldo carved out by waterfalls. From Pecol di Zoldo near the departure point of the Coste chairlift, proceed in the direction of the baita al Casot hut. After a short while, there is a diversion to Le Palanche, a beautiful picnic area from where, by a simple path, you first reach Gavon Picol and then Gavon Grant. It is possible to close a circular itinerary by reaching Baita Civetta Al Casot and then return along the piste on the right or climb to Plan del Crep to return to the cablecar.
